

## CLAIMS

### What is claimed is:

1. A side hook for a shower curtain, mainly made up of a fixing clip having a base with a double-sided adhesive tape applied thereon disposed at one side thereof, and an arc flexible plate disposed at the other side thereof in clamping abutment with the base thereof wherein a clamping passage is defined at the bottom ends of the base and the arc flexible plate there-between for both lateral sides of a shower curtain to be pushed there-through for clamping location at the fixing clip therein.
2. The side hook for a shower curtain as claimed in Claim 1 wherein both the base and the arc flexible plate thereof have fixing teeth protruding at the corresponding inner side thereof respectively in clamping abutment.
3. The side hook for a shower curtain as claimed in Claim 1 wherein the flexible plate of the fixing clip can be an arc in shape.
4. The side hook for a shower curtain as claimed in Claim 1 wherein the fixing clip can also have a flexible plate with an arc slope and a plane section extending at one side thereof to form a clamping passage defined at the bottom ends of the base and the flexible plate thereof; a plurality of fixing teeth are protruded at the inner side of the plane section of the flexible plate in clamping abutment with the corresponding inner side of the base thereof.
